Performance notes: 1.) When this piece is performed by a large choir, you may want to consider having all the solo parts sung by a group of soli, rather than a single soloist.
2.) Wherever there are rhythmic patterns that involve a 16th-note (such as the 2nd beat of m.7 and the 1st two beats of m.13), these rhythms should flow smoothly, so as to preserve the overall phrase, and should not be accented.

With simple expression and unrushed ($\text{♩} = \text{ca. } 70$)
